## SKILLS

**Web Development**

- React.js
- Vite
- Node.js
- Express.js

**Development Tools**

- Git/GitHub
- VS Code
- Vercel/Netlify

**Computer Science Fundamentals**

- Data Structures
- Algorithms
- Calculus I, II, III
- Object Oriented Programming

## CAREER OBJECTIVE

Computer Science Junior seeking an internship position where I can increase my skills in full-stack development, algorithmic problem-solving, and user-focused application design to create impactful digital solutions.

## PROJECTS

### Pirates Rebuild Analytics

**Link to Project: [toadmoose on GitHub](https://github.com/toadmoose)**

📅 May 2025

- Developed a comprehensive analytics dashboard to visualize and evaluate Pittsburgh Pirates roster data
- Implemented data cleaning and transformation processes using pandas to prepare baseball statistics for analysis
- Created interactive visualizations with Matplotlib to display team performance trends and player valuations
- Developed Python scripts to process and organize player data from CSV files, including salary, age, and performance metrics

### UPJ Geoguesser

**Link to Active Website: [Vite + React]**

📅 February 2025 - March 2025

- Developed a location-based game where users identify campus landmarks from photographs
- Implemented geospatial calculations to determine accuracy and scoring based on distance
- Created a responsive UI with interactive maps using React Leaflet
- Designed and implemented persistent leaderboard functionality using localStorage
- Used Git for version control and deployed application to a live web environment

## WORK EXPERIENCE

### Resident Assistant

**University of Pittsburgh at Johnstown**

📅 August 2023 - current        📍 Johnstown, PA

- Enhanced the University's safety and morale by caring for over six buildings with over 200 residents, managing facility issues, issuing keys, and handling resident conflicts
- Maintained detailed documentation of incidents and resolutions, ensuring accurate information for university records

### Server

**Olive Garden**

📅 April 2023 - current        📍 Greensburg, PA

- Fostered a welcoming environment while tending to multiple tables at once, caring for all the customers' needs while helping fellow employees during peak business hours
- Collaborated in a fast-paced team environment, communicating effectively to ensure seamless service delivery
